

L-200

The acoustic box called L-200 is a high performance speaker, which is indicated for installing into large surfaces where the high sensitivity and power are needed.

It is compound by a 10" woofer, which has got an elevated output, and a 1.4" compression engine in order to improve the diffusion range of sound.

It contains a bass reflex for making larger the response in low levels.

The enclosure is made of wood with textured finish.

For the mounting, it could be installed by an adjustable bracket or with fixed position by a bracket for mounting on wall or ceiling.

Features:

- High quality reproduction
- Lineal frequency response: 65 – 18,000 Hz (+/-3dB)
- Coherent phase response
- Low harmonic distortion
- Metallic grille transparent acoustically

TECHNICAL SPECIFICATIONS

NOMINAL POWER	300W AES
FREQUENCY RESPONSE	65-18,000 Hz. (+/- 3 dB)
SENSITIVITY	98 dB +/- 3dB (1 W, 1 m)
MAXIMUM PEAK SENSITIVITY	123dB
IMPEDANCE	8 ohm
DISPERSION	90° horizontal / 50° vertical
COLOUR	Black RAL 9005
CONNECTOR	Speakon (double, parallel connection)
SPEAKERS	10" Woofer and 1.4" tweeter
FIXING (Optional)	Eyehooks (x 5)
DIMENSIONS (width x height x depth)	351 x 500 x 317 mm.
WEIGHT	18 Kg.

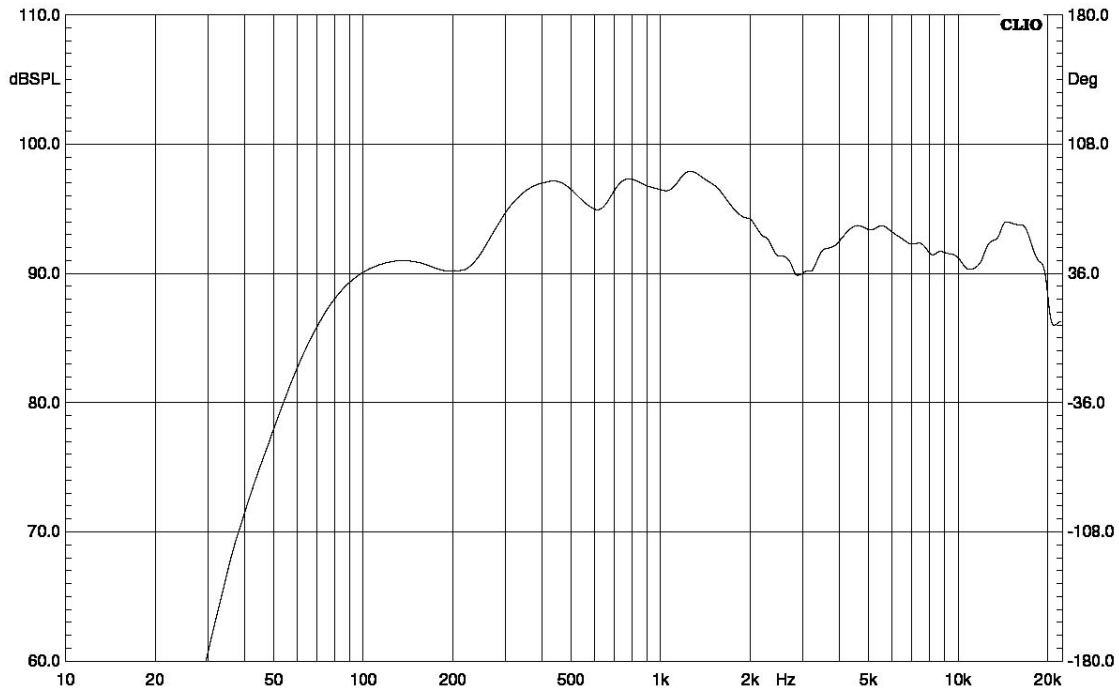

L-200

Applications:

- Fair and conference centres
- Voicing
- Discos
- Outdoors
- Factories and warehouses
- High quality Public Address
